## EXPERIENCE

### Teleflora, Oklahoma City, OK — *Web Developer*

Dec 2017 - present

- Build standard and custom sites provided by the design team
- Make the edits and fix site issues across the custom platform. These are tracked by using Jira.
- Document the process of building the custom site builds.
- The current stack that is used here is HTML5, Sass/CSS3, JavaScript (Jquery and Backbone.js)

### PipelineROI, Oklahoma City, OK — *Web Developer*

Oct 2015 - Dec 2017

- Phone consultations with customers to plan the development and branding of the web site
- Build the website from a template
- Design new website templates for customer to choose from
- Design stock content pages for customer sites
- Design custom pages for customers
- Fix any design issues that may arise on a customer's site
- The stack used to complete the sites were HTML5, CSS3, JavaScript and JQuery, and Bootstrap 3.1.1

## EDUCATION

### Pluralsight.com & Udemy.com, online courses — *Web development*

These classes were provided through the company or purchase by me to continue to improve my skill level. I have focus a majority of my time with web development skills that are focus with learning JavaScript and the different frameworks and libraries associated with it.
